Jennah,

The NPL proposal is the first step of the Superfund Remedial Process and by placing this site on the NPL, the site will undergo a remedial investigation/feasibility study which will characterize the extent of contamination and evaluate impacts and associated risks to human health and the environment. Based on sampling already conducted by ODEQ/EPA a need for a removal action at this site has not been identified. Residential drinking water wells have not been impacted. ODEQ has been working with the residents throughout this process to keep them informed and to address their concerns. Let me know if you have any other questions.

Thanks, Brenda. I have a question about the site that I hope someone in this group can help with.

What, if any, is the danger to the six homes and church on the property? What has been done to make sure the contamination isn't migrating into their water or soil, or what will be done in the interim before the removal action and final remedy?

Just trying to anticipate press questions.

NPL Proposed Rule #58 and Final Rule #56 were signed today.

The proposed rule proposes to add 9 sites to the NPL and the final rule adds 9 sites (including one fed facility) to the NPL. See table of sites below.

The rules are anticipated to be published in the Federal Register on Thursday, May 23. The HQ press release is projected to be issued on the afternoon of Tuesday, May 21 and the Superfund website will be updated with the new information and supporting documentation concurrently with the issuance of the press release.

Congressional representatives are expected to receive their notification letters on the morning of Tuesday, May 21.

Attached is the most recent version of the HQ press release. If Regional press offices would like to coordinate with HQ, please have them call the HQ press office directly.

Please let me know if you have any questions. Thanks.
